

## **TynTec announces record growth with staff numbers doubling**

*Mobile messaging specialist announces record revenue growth and concerted new recruitment drive*

**December 13<sup>th</sup>, 2007 – London, UK** – Mobile messaging services provider TynTec ([www.tyntec.com](http://www.tyntec.com)) today announces record growth over the last year. The company's ongoing expansion is underlined by the fact that staff numbers have doubled, revenue gone up by 60% and the total number of mobile transactions has increased by 80%. To accommodate such growth, TynTec is opening a sales office in Singapore in the new year.

This development has led to TynTec embarking on a recruitment drive in Singapore and Europe designed to seek the best available talent to staff the growing company. As TynTec operates in a fast-growing market, offering mobile messaging services to companies such as 09 Mobile, British Airways and O2, the demand for employees is continually growing.

TynTec's growth is down to its range of market-leading mobile messaging services. The last year has seen the company develop a portfolio of separate messaging products for operators, enterprises, aggregators, ISPs and resellers such as SMS hubbing, managed services and enterprise and banking SMS. New services such as the Voice Network Query and Voice-Enabled Long Numbers have proved to be a huge success as well. Additionally the implementation of the TynTec Supernet SMS-C, which provides customers with an improved quality of SMS transmission, has also had a key role in the growth of the company.

Michael Kowalzik, CEO of TynTec, said: "The last year has seen TynTec go from strength to strength as we have signed some great deals and developed an innovative raft of services around our core technology. We hope to carry this momentum forward and in order to do so we will need the best possible staff to help us achieve this goal."

### **About TynTec**

TynTec is a mobile messaging service provider, offering powerful SMS functionality to operators, enterprises, aggregators, ISPs and message resellers. Through partnerships with mobile operators the company has unique, multiple points of access into the deep level (SS7) mobile telecoms network, enabling it to offer a new level of quality in messaging services.

TynTec offers a range of services that leverage its network access including international SMS hubbing, outsourced operator messaging services and enterprise SMS.

TynTec works with a wide range of mobile operators and major global businesses including O2, T-Mobile, Accenture, British Airways and Google.

**Products**

**IMT** - International Messaging Transit (IMT) is an SMS hubbing technology – it facilitates the seamless global interoperability of SMS between operators without the need for hundreds of costly individual bi-lateral interoperability agreements

**Managed services** - TynTec's Managed Services enable operators of all sizes to outsource non-core technical activities such as long-number SMS reception, OTA, number range hosting and even the entire SMS-C

**Enterprise SMS** - TynTec's enterprise services division offers businesses carrier-grade SMS messaging, enabling them to use SMS in mission critical applications and corporate communications
